Read why you should **Consider Working Overseas.**

Ten Cool Hot Spots in LA

Explore what the entertainment capital of the world has to offer.

With its sprawling city limits, Los Angeles can be a tricky city to navigate for visitors - even before they get stuck in the city's infamous traffic. However, it pays to explore the great City of Angels due to the abundance of oh-so-cool shops, delicious eateries and unrivalled nightlife. Below are ten suggestions that should make it onto any to-do list for those visiting LA.

Griffith Park and Observatory at Sunset

This iconic observatory affords a fantastic view of downtown as well as the rest of the city at any time of day. It's at sunset, however, when it really comes into its own. Set high up in the hills, there is even a glimpse of the famous Hollywood sign alongside the wide vista of the ocean. It is truly stunning, so allow enough time to soak in the atmosphere of this awe-inspiring spot. You won't regret taking the time to either hike or drive up to one of LA's most visited destinations.

2800 E. Observatory Rd. | Los Angeles, CA 90027
www.griffithobservatory.org

Gjelina

Gjelina is a restaurant with a chilled out vibe that serves food that is not only organic, but is also sourced as close-by as possible. This ethically-minded institution became the toast of the town when it opened almost a decade ago. The menu is hearty yet healthy and will have you wanting to go back time and time again. Luckily, it is open for breakfast until midnight (11pm on Sundays) so you'll have all day to try their California fusion menu.

1429 Abbot Kinney Blvd. | Venice, CA 90291 | 310-450-1429
www.gjelina.com

RTH Shop

RTH Shop is another LA hangout focused on ethical and sustainable living. That said, their clothes are far from burlap sacks and hemp pants. Instead, expect to find well-made items of clothing mixed in with some curated vintage finds. Quirky, yet understated, this is the place to head to if you are searching for a chilled-out festival look that evokes California style. You'll leave with a shopping bag full of stunning pieces for your wardrobe.

2537 N. La Cienega Blvd. | W. Hollywood, CA 90048 | 310-289-7911
www.rthshop.com

Avalon Vintage

Avalon Vintage is another vintage gem that LA seems to excel in. If you love worn logo t-shirts amongst a huge selection of vinyl records and other memorabilia, this is the place to visit. Avalon Vintage offers a memorable shopping experience because of the well-informed staff and their remarkable selection of clothing. You will find it impossible to leave without picking up a unique piece. There is really no place like this shop on the coast!

106 N Ave 56 | Los Angeles, CA 90042 | 323-309-7717
www.avalon-vintage.business.site

The Abbey

The Abbey is a bar in LA famed for offering the LGBTQ community an unforgettable night out. If you are looking for a night full of dancing, cocktails and fun then this is the place to go. It features several bars and lots of outdoor spaces which makes this place very LA cool. You won't be disappointed at this West Hollywood hotspot; it's famous for a reason and has survived decades of new bars and clubs opening up on its doorstep.

692 N Robertson Blvd. | West Hollywood, CA 90069 | 310-289-8410
www.theabbeyweho.com

It pays to explore the great City of Angels for its oh-so-cool shops, delicious eateries and unrivalled nightlife.

Sound Nightclub

This huge nightclub has hosted some of the best and biggest DJs in LA. This club pulses continuously - making it the place to go for a night of dancing and awesome music. Located just off Hollywood Boulevard, this is a high-end establishment filled loud music. It's a huge space so there's room for everyone.

1642 N Las Palmas Ave. | Los Angeles, CA 90028 | 323-962-9000
www.soundnightclub.com

The Butcher's Daughter

Any trip to the well-known vegetarian and vegan restaurant Butcher's Daughter in Venice will inspire you to go home and completely renovate your own house. The décor is seriously stylish and very HGTV worthy. It has a delicious menu to match, making it the perfect place to head to if you need a specialty coffee in the morning to start your day. It's open throughout the day, so if you are interested in a relaxing dinner, this Venice hang out makes a great destination with its varied menu.

1205 Abbot Kinney Blvd. | Venice, CA 90291 | 310-981-3004
www.thebutchersdaughter.com

189 by Dominique Ansel

This restaurant, situated in "The Grove" area, is a must-see place for brunch on Saturdays and Sundays. Its unconventional offering makes this place a fun destination worth the trip especially given the beautiful dining room. For brunch, the restaurant doesn't offer any menus, instead boards of food

are offered to all diners from which they select what they want to eat. Once they have selected their food, their brunch card is stamped by their server. It's absolutely delicious and a very unique experience.

189 The Grove Dr. | Los Angeles, CA 90036 | 323-602-0096
www.dominiqueansella.com/the-restaurant

The Chestnut Club

If you like cocktails, and you like them classy, head to The Chestnut Club in Santa Monica. They have a varied playlist that is loud enough to enjoy, but soft enough to carry on a conversation. For a touristy part of town, this place is often filled with locals for an authentic Santa Monica experience.

1348 14th St. | Santa Monica, CA 90404 | 310-393-1348
www.thechestnutclubsm.com

N/Naka

N/Naka is a fantastic option if you are a foodie and want a real treat. The minimal interior decor is at odds with the 13 course menu - all delivered with impeccable service by the staff. The cuisine is Japanese, but the N/Naka team had an obvious Californian influence when creating this one-of-a-kind menu.

3455 Overland Ave. | Los Angeles, CA 90034 | 310-836-6252
www.n-naka.com ■

The Benefits of Working in a Teaching Hospital

Many physicians will work in a teaching hospital during their residency years – perhaps longer if they chose to pursue a fellowship. But teaching hospitals are not only an essential workplace at the beginning of a physician's career – they have much to offer throughout your career.

Reason #1: Your Choice of Specialty

Teaching hospitals are the backbone of medical services in the USA. The nation's 1,000+ teaching hospitals train more than 100,000 new physicians and other health professionals every year. They disproportionately deliver specialized services, complex treatments and life-saving care, including 88% of comprehensive cancer care centers and 71% of all level-one trauma centers. This makes teaching hospitals a natural choice for physicians working in these specialized services.

Reason #2: A Culture of Excellence

In a 2016 article in the [Washington Post](#), Harvard medical professor David Silbersweig noted that “physicians in other settings routinely refer patients to teaching hospitals when they can't figure out what is going on, when there are complications, or when they have run out of treatment options.” A 2002 literature review by John Z Ayanian and Joel S Weissman looking at teaching hospitals and quality of care found that “for common conditions, particularly in elderly patients, major teaching hospitals generally offer better care than do nonteaching hospitals.” It is this commitment to delivering

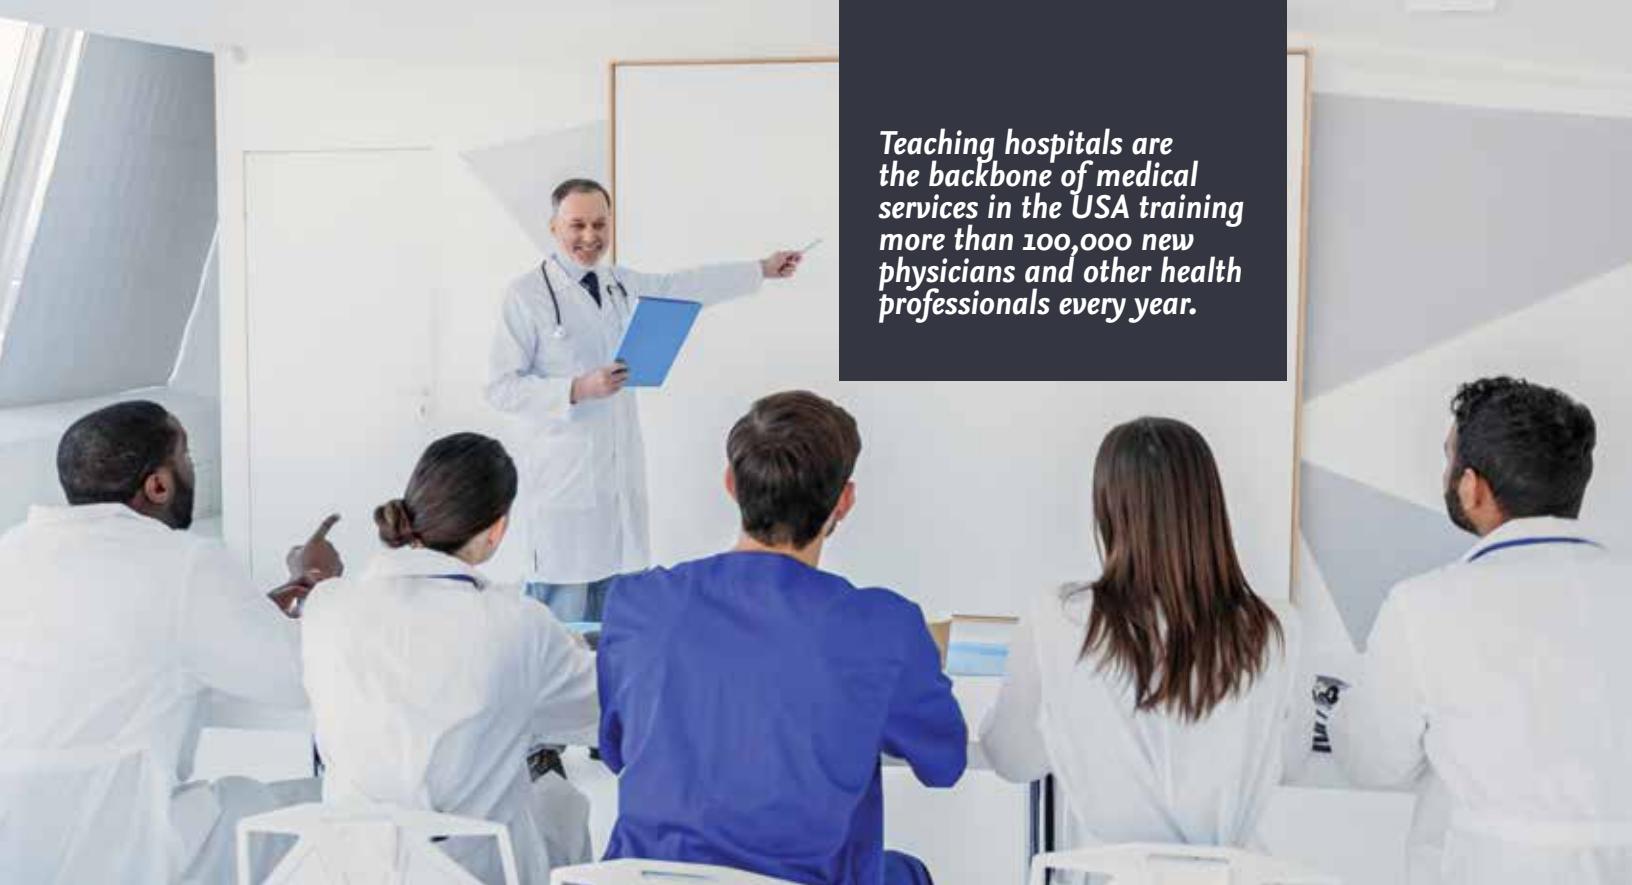

excellent care that attracts the best and the brightest to our teaching hospitals.

Reason #3: Leading Edge Research and Treatment

One of the reasons teaching hospitals are highly regarded and able to offer such excellent care is because of the research and clinical trials that are undertaken by them. This ensures our teaching hospitals are the leaders in new treatments and cures. The possibility of being at the forefront of medical breakthroughs is a strong reason for choosing to work at a teaching hospital. But you don't have to be at the forefront of research to benefit from this aspect of a teaching hospital: the culture of teaching hospitals ensures that these analyses and breakthroughs are shared throughout the institution. Silbersweig argues, “only academic medical centers can provide the environment and expertise that advance the practice of medicine, and ultimately the health of society.”

Reason #4: Publishing Research

Being involved in leading-edge research doesn't only advance the care you are able to offer patients, there are personal advantages too. First, the ability to stay in the forefront of your chosen field. Second, publishing research or being co-author on an important paper based on the research conducted at your teaching hospital offers opportunities for career advancement you simply can't get at another institution. One of the world's most internationally recognized medical journals, the [BMJ](#), references the following benefits of publication for your career: “Career advancement. International recognition. Advancing

Teaching hospitals are the backbone of medical services in the USA training more than 100,000 new physicians and other health professionals every year.

medicine. An influx of funding. These are just a few of the benefits associated with publishing medical research in a peer-reviewed journal with a high impact factor.”

Reason #5: Travel

The benefits of participating in leading-edge research expands your boundaries beyond advancing standards of care and advancing your career. The possibility of national and international travel to present research findings are another major benefit. While the prospect of international travel might not be attractive to physicians who are already struggling to balance work and life with the needs of a young family or the other demands of home life, the prospect of being paid to present your findings to other leaders in your field in international centers of excellence is an undeniable attraction to some. If you have this opportunity, it’s worth referring to the presentation tips offered by the [American College of Physicians \(ACP\)](#).

Reason #6: More Opportunities to Learn

In training young doctors, Lara Goitein argues, “Medical education is essentially a verbal tradition: knowledge is imparted by physicians talking and demonstrating what they mean at the patient’s bedside much more than through the written word.” The teaching hospital offers the greatest opportunities to nurture your talent.

Reason #7: Being Mentored

The Institute of Clinical Research Education states, “Mentoring is the key for developing and sustaining a satisfying professional career.” The greater potential to connect with mentors is another powerful reason to choose to work at a teaching hospital. Compare this with the talent pool with whom you are able to connect in a small rural hospital and you can clearly see the advantage of working in a teaching hospital in terms of finding someone from whom you can learn and make a valuable personal connection.

Reason #8: Being a Mentor

The advantage of this wider talent pool in teaching hospitals works both ways. For more senior caliber staff, the opportunity to share your knowledge with passionate and motivated junior staff is compelling. Being a mentor is a rewarding experience and the teaching hospital environment offers far more potential for connecting with others whom not only share your specialty but whom share your passion.

Reason #9: Improved Career Prospects

For all these reasons, a teaching hospital offers one other major advantage: improved career prospects. Whether through mentoring, research, published articles or simply exposure to leading-edge treatments and technologies and high-caliber peers, working at a teaching hospital is good for your career.

Reason #10: Better Job Satisfaction

What's more, the culture of excellence and the enhanced opportunity for learning and knowledge-sharing in a teaching hospital are important contributors to increased job satisfaction. In an age when we are seeing a crisis in **physician burnout** and high numbers of people leaving the profession, job satisfaction is more important than ever – both on a personal level and for the profession and service as a whole. Of course, there is a role for mentors in modeling and supporting work-home balance, but the spiritual satisfaction of delivering the highest quality of care and sharing knowledge with peers and juniors helps to recharge depleted batteries and reconnect physicians with the reasons they went into the career in the first place.

Whatever stage you are in your career, working in a teaching hospital can be an incredibly rewarding experience; helping you to develop your career while offering you an opportunity to give back to those just starting theirs. ■

SAINT JOSEPH
HEALTH SYSTEM
PHYSICIAN NETWORK

Neurologist

Saint Joseph Physician Network
Saint Joseph Health System
Mishawaka, Indiana

Three neurologists desire to add a fourth BE/BC neurologist to their growing practice. The practice is general neurology though candidates with sub-specialty interests are welcome. Each physician sees about 10-15 patients per day. Ability to read EEG's and perform EMG's is a plus but not mandatory. Call is every 4th week when you work as the neuro-hospitalist covering the inpatient service and the ED. The other weeks are in the clinic. Again, all sub-specialty interests are welcome with a particular interest in a Sleep Medicine fellowship trained neurologist. We estimate the Sleep Medicine provider would read about 700 studies a year; Medical Director status is possible for the right candidate. Approximately 20% of your time will be for Sleep Medicine, reading studies and managing those patients; 80% is general neurology.

The new and modern office setting is conveniently located in our Medical Office Building which connects to the hospital. The neurologists are employed within the Saint Joseph Physician Network which is part of Saint Joseph Health System. Our Mishawaka hospital campus is a 254-bed (all private rooms) hospital. A competitive compensation and benefit package is being offered.

Manager of Physician Recruitment for SJHS
at paul.charkowski@sjmc.com, or phone at 574-335-8750.

Join One of the Premier Healthcare Systems in Virginia

Sentara Medical Group in Beautiful Virginia!

Sentara Healthcare, an Award Winning, Innovative Healthcare System in Beautiful Virginia, is looking for 3 neurologists for our expanding neurology division. Sentara is one of the most integrated and progressive healthcare organizations in the nation. Recognized nationally for our quality of care, technology and innovation, we are comprised of 13 hospitals across Virginia and Northeastern North Carolina and Sentara Medical Group, an over 1,000-provider multispecialty group.

Clinical research initiatives are encouraged and supported. All candidates will have an appointment in the Department of Neurology at Eastern Virginia Medical School (EVMS) and have an opportunity to participate in our educational mission. The Institute has neurology subspecialty representation in vascular neurology, epilepsy, neuromuscular disorders, cognitive disorders, headache, movement disorders, neuropsychology and autonomic disorders.

Three Excellent opportunities:

1. **Neuro-Hospitalist** based at Sentara Norfolk General-voted #1 Hospital in Virginia, a 543 bed quaternary care facility and Primary Stroke Center with a dedicated Neuro-ICU. The opportunity will be 7days on/ 7 days off with resident physicians and advanced practice clinicians supporting the busy service.
2. **General Neurologist** based at Sentara Obici Hospital, a well equipped, full-service, 176-bed facility with Primary Stroke Center Certification in beautiful Suffolk, VA. This predominately outpatient opportunity has APC support and no stroke call responsibility. Call 2-3 times a month and every 5th-6th weekend.
3. **General Neurologist** based at Sentara Northern Virginia Medical Center, a well equipped 183 bed facility in Woodbridge VA, 25 miles south of Washington, DC. This is a primarily outpatient opportunity with beautiful office on the hospital campus.

Live where others vacation!

- Lucrative compensation and benefits including pension plan
- Loan Forgiveness
- PA/NP support
- Teaching opportunities
- Excellent schools
- Great lifestyle

Practice in a beautiful Southern Coastal region or just south of Washington DC! Both offer excellent shopping, dining, cultural and recreational opportunities.

For more information contact

Your community not-for-profit health partner

Consider Working Overseas

CONTRIBUTOR: MELANIE GRANO

One of the best aspects of being medically qualified is the complete portability of your skills. Wherever you are in the world, people always need doctors. US-trained doctors are in demand in many places in the world; your choice of career and high-quality training gives you unparalleled opportunities to work overseas – whether in a paid position or in a voluntary role. There are many reasons physicians choose to work abroad: to develop a specific skill or knowledge in a prestigious world-leading center; the opportunity to experience different cultures, sightseeing and activities in another country; or perhaps for an improved work/ life balance.

Deciding which country offers the greatest potential for you to work abroad will very much depend on what your priorities are and what you are looking to gain from practicing medicine overseas. For that reason, it is important to think about what you want to achieve from working overseas before looking at the possible options available. Think about what is important to you. In fact, according to the Association of Staff Physician Recruiters (ASPR), nearly 60% of in-house physician recruiters are using behavioral interview questions to determine factors such as:

- Potential for travel within the country
- Opportunities to move from job to job
- The salary you can expect
- Available technology
- The healthcare environment in which you'll be working
- The type of care you'll be able to deliver to patients.

Giving thought to what you want from a job will help you to narrow down the choice of countries in which you might wish

to work. There are other important factors that may further influence your decision.

Speaking a Foreign Language

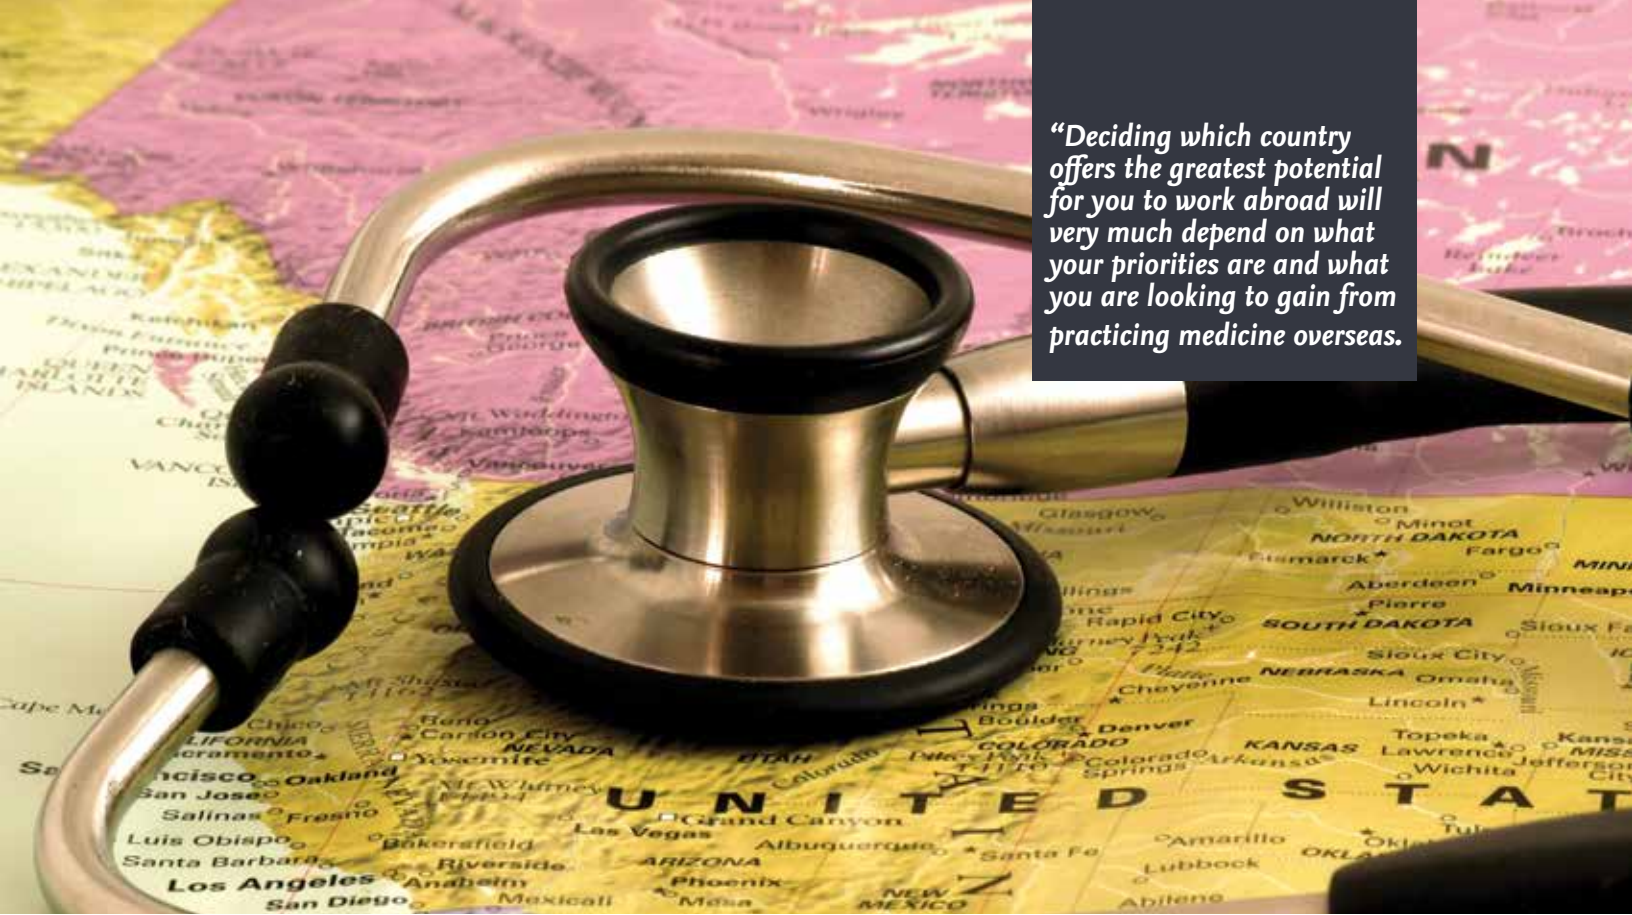

Things are far easier if you choose a country where you speak the language. The practicalities of diagnosing and treating patients without being able to speak their language are a difficult hurdle to get over, especially in emergency relief teams.

However, to gain employment in a national health service, a practice or hospital overseas, you'll need to demonstrate proficiency in the local language. In most cases, this will mean a language test. For example, to work in the Netherlands as a physician coming from overseas, you will need to demonstrate language competency in Dutch to the NT2-B2 level – although the advice is that in practice you will need a level of C1 or C2.

For this reason, for US physicians, Canada, Australia, New Zealand, Ireland and the UK are the most obvious options for working overseas. If you are fluent in Spanish, your employment target widens to most of Latin America, Mexico, South America and Spain, although salaries and conditions vary considerably.

Salary Considerations

A 2016 survey featured on career addict cited the USA as the country with the third highest salaries in the world in which to work as a physician – with salaries for specialists averaging

A close-up photograph of a silver stethoscope with black tubing and earpieces. The stethoscope is resting on a map of the United States, specifically over the central and western regions. The map shows state boundaries and major cities. The stethoscope's chest piece is prominent in the center, and the tubing curves around it. The background is a soft-focus map with various state names like California, Nevada, Arizona, and Texas visible.

“Deciding which country offers the greatest potential for you to work abroad will very much depend on what your priorities are and what you are looking to gain from practicing medicine overseas.”

\$230,000 per year, and GP salaries averaging around \$161,000 per year.

On pure salary alone, only two countries rank higher: Australia and the Netherlands. Salaries in Australia average \$247,000 for specialists and \$91,000 for GPs. The Netherlands took the top spot with salaries averaging \$253,000 for specialists and \$117,000 for GPs.

Denmark, Switzerland, Ireland, France, the UK, Canada and Belgium comprise the rest of the top ten countries to work in as a doctor in terms of salary. Of course, this measurement doesn't take into account the general cost of living in those countries – or the cost of malpractice insurance. The spiraling cost of insurance in the US would see it fall a few places in the table, were it to be taken into account.

You will also need to consider which specialties are most in demand in each country as this will have an impact on the salary you can expect to earn as a specialist. If you are thinking of staying in a country long-term, specialists will also need to consider the opportunities for private practice in conjunction with their salary. In both Ireland and the UK, experienced specialists have plenty of opportunities for lucrative private work and most specialists will split their time between public and private practice.

Bear in mind, however, that if you are an American citizen, you'll need to pay US taxes on the income you earn overseas, as well as any local taxes in the country in which you are working.

The Local Culture

Local culture is another important factor to consider. For example, in the United Arab Emirates (UAE) physician salaries are among the highest in the world. And one major benefit in the UAE is that your salary is not subject to local taxes. However, this opportunity to put significant savings away does require some compromises. Foreign workers in the UAE live in gated ex-pat communities; while they afford many luxuries, this isn't for everyone. And while cities like Abu Dhabi and Dubai are among the most westernized in the Middle East, the way of life is very different.

By contrast, the cultural shift required for a move to an Australasian country is much less dramatic. Added to this, the work-life balance in Australia and New Zealand, with the focus on outdoor activities and the unique and wonderful sightseeing and scenery, make these countries an appealing prospect for US-trained physicians.

Meanwhile, the UK and Ireland afford easy travel access to Europe for short breaks and vacations to experience the culture and many historical cities and regions on the continent.

Local Conditions

The local health care delivery model can also impact significantly on your experience working as a physician abroad, so it is important to do your research about the local delivery models, services and conditions before making the move.

For example, in the UK, the National Health Service (NHS) is undergoing a lengthy and serious funding crisis. This underfunding is making conditions in many facilities highly pressurized and salaries are not what they once were. The exception to this is if you go and work as a locum, filling staff shortages on a temporary basis, in which case NHS staff shortages are driving up the salaries you can expect to command. The pay-off for this is, of course, the uncertainty of income. And it does nothing to address the underfunding and diminishing morale in the state-run facilities.

Meanwhile, in Belgium, physicians are rewarded with high salaries – but their work week is one of the longest in Europe. Doctors there average a 51-hour work week. These differing conditions make it essential to do your research thoroughly before you apply. Arrange to speak with other physicians who have worked abroad.

Seeking a Position

International online job boards make it much easier to seek and find international employment opportunities today than it was just a couple of decades ago. There are many locum agencies that specialize in international placements and it is also worth investigating local Temp and Permanent agencies.

One of the best ways to find potential opportunities to work is through the local medical publications in your chosen country. For example, the BMJ in the UK, the Medical Journal of Australia in Australia, or the New Zealand Medical Journal in New Zealand.

If you need to be in a particular location (for example, to follow your partner's job, or other family commitments), you may need to search for local facilities and hospitals and approach the appropriate specialties directly. This way, you benefit from the in-depth contact with medical staff to know when a vacancy is available and gain more knowledge of the facility and team.

If you are interested in humanitarian work, the best places to start are respected medical organizations such as Médecins Sans Frontières or Medical Emergency Relief International. If you are able to give your time voluntarily, Voluntary Service Overseas and Médecins du Monde are other possible routes which rely on international health professionals.

Securing a Job Offer

One of the benefits of applying through an agency is that they are likely to help you with the visa and registration process if you are offered a position through them. If you aren't using an agency, make the effort to investigate what support your future employer can offer in this regard.

You can find more information online with the local medical boards for the country or, in Canada, the province in which you intend to work.

General Neurologists: Downtown and Western Suburb Opportunities

Opportunity Profile:

The Department of Neurological Sciences at Rush University Medical Center is growing and looking to add BC/BE academic and community neurologists. Positions are available at a new multidisciplinary ambulatory center located in the South Loop, at our community hospital in the western suburbs, as well as the new out-patient surgery center in Oak Brook, IL. Candidates at all locations will have a faculty appointment and join the Department of Neurological Sciences at Rush University Medical Center. All opportunities will include outpatient and inpatient settings and a chance to see a wide variety of neurological diagnoses. Teaching and research opportunities are also available if desired by the candidate. Qualified candidates must be graduates from an ACGME-accredited neurology residency and must be board certified in neurology. Outstanding clinical skills are required. Candidates will have a faculty rank commensurate with experience. A competitive salary and benefits package are available. See below for openings in our three locations:

Locations:

Rush-Copley Medical Center – Aurora, IL:

As part of a key strategic growth initiative, Rush is recruiting two full time general neurologists dedicated to the Rush-Copley Medical Center location. Qualified candidates will work with hospital leadership to grow and develop the Rush-Copley neurology program. Rush-Copley Medical Center has been part of the Fox Valley for over 130 years and has evolved into a busy community medical center with all of the technology and interdisciplinary elements found in academic centers. Today, the medical staff totals over 500 board certified physicians representing over 60 specialties. The New Partnership between Rush University Medical Center and Rush Copley Medical Center is unique as it harnesses clinical expertise, academic excellence, research and a broad community-based network, to transform the model for academic medicine.

Rush Oak Brook Outpatient Surgery Center – Oak Brook, IL:

The Department of Neurology is seeking a general neurologist for Rush's new multidisciplinary, state-of-the-art outpatient surgery center in Oak Brook, IL, opening in January, 2019. The Rush Oak Brook out-patient center will feature 65 exam rooms for patients; physical and occupational therapy; a laboratory; and full imaging services, including MRI, X-ray and CT imaging as well as a comprehensive breast imaging program with ultrasound and bone densitometry. The 100,000-square-foot facility is a joint venture with Midwest Orthopedics at Rush.

Rush South Loop – Chicago, IL:

Neurologists are needed for Rush's newest location opening in the South Loop downtown in October 2018. Neurologists will have a faculty appointment on Rush's main campus while maintaining full clinical privileges at the South loop location. The South Loop clinic, located on Michigan Avenue at 14th Street, will provide primary and specialty care services. The 41,498-square-foot facility will feature an innovative exam room and work space layout, full imaging capabilities among other features designed to enhance the patient and provider experience.

Interested candidates please forward a cover letter and CV to:
Faculty_recruitment@rush.edu

Kymera Independent Physicians is a multi-disciplinary group of independent physicians in southeast New Mexico based out of Roswell, New Mexico. We have 4 clinics in the 3 cities; Roswell, Carlsbad, and Hobbs. Specialties and sub-specialties include Cardiology (Interventional and Invasive), Endocrinology, Neurology, Rheumatology, Internal Med, Family Practice, and Hematology/Oncology. In all clinics we have also established a Walk-In/Same Day Clinic for Primary Care. The practice does operate its own "state of the art" lab, Radiology, Pet/Ct, diagnostic Ct, Ultrasound, Echo, Nuclear Camera, EEG, EMG. Due to Hematology and Oncology being part of the practice we operate 3 infusion suites in 3 of the 4 clinics. We will soon be opening a dispensing pharmacy in our new Multi-Disciplinary Clinic which just completed construction in December of 2017.

Excellent Neurology Opportunity in Southwest Ohio

CMH Regional Health System is seeking a BC/BE Neurologist to join an established hospital-employed practice in Southwest Ohio. The Neurologist will provide outpatient services as well as inpatient services, such as EEGs and consults. There are EMG capabilities in the outpatient clinic in the medical office building that is connected to the hospital. There is a strong need for Neurology services in the area, so you will be able to build a successful practice quickly. CMH has recently been certified by The Joint Commission as an Acute Stroke Ready Hospital, bringing life-saving stroke interventions and telemedicine to the region, and its service area exceeds 100,000 people.

We offer a highly competitive recruitment package, which includes:

- Competitive base salary plus incentive compensation
- Competitive sign-on bonus
- Assistance with medical education loan repayment
- Relocation assistance
- Great benefit package – including malpractice insurance

About the community

Combining the best of small-town values with big city accessibility, Clinton County is within easy commuting distance to the major metropolitan areas of Columbus, Dayton and Cincinnati. Wilmington, the county seat, offers affordable living in a community that values family life, educational excellence and professional opportunity. Wilmington's downtown is on the National Register of Historic Districts and has also received designation as an Ohio Main Street Community, a program designed to preserve historic downtowns. Landmarks include the Murphy Theatre, Wilmington College, the Roberts Convention and Visitors Centre World Equestrian Center, and the country's largest privately-owned airport.

Coastal Virginia has a New Neurology Opportunity!

Bon Secours Medical Group, part of Bon Secours Health System, includes an extensive network of over 200 primary care and specialty care physicians and providers who serve patients at more than 50 locations throughout southeastern Virginia.

What we offer our physicians:

- Competitive compensation package that includes base salary, productivity incentives, a full range of benefits, sign-on bonus, loan forgiveness and relocation assistance. Fully integrated Epic EHR used in both the ambulatory and acute care settings.
- Clinic on hospital campus
- ED Coverage by Tele-Neurology
- APC Support in clinic
- Inpatient / Outpatient mix

What our practices offer our patients:

- EMG & EEG studies, sleep studies, general neurology.
- Part of Comprehensive Stroke Network
- Maryview Medical Center – Highest stroke honors 3 years in a row as a Gold Plus Target Honor Roll Elite Plus facility.
- Joint Commission Advanced Primary Stroke Center since 2010.

Region:

Hampton Roads is uniquely situated at the mouth of Chesapeake Bay in southeastern Virginia. Composed of the cities of Norfolk, Virginia Beach, Portsmouth, Suffolk, Chesapeake, Hampton and Newport News. It is the nation's 37th largest metropolitan area. The region is known for its picturesque beaches, distinctive cities and rich history.

Excellent Neurology Opportunity in South Carolina

There is an excellent opportunity for a BC/BE Neurologist to develop a new practice for the community of Hartsville, South Carolina and surrounding areas. The position is primarily outpatient with the need for some inpatient consults, however there is little call responsibility. Carolina Pines has Tele-Neurology and Tele-Stroke services in place in the Emergency Department offered by the Medical University of South Carolina (MUSC). These services are available to aid the on-site Neurologist, minimizing call burden. Carolina Pines also has a 4 bed Sleep Lab, so there is an opportunity to practice Sleep Medicine if desired.

This is an employed position with competitive compensation and bonus potential, sign-on bonus, relocation assistance, potential assistance with medical loan repayment, as well as a comprehensive benefits package including, malpractice coverage, medical/dental/vision, and CME allowance.

WORK ENVIRONMENT FEATURES:

- Strong primary care base and immediate ramp up potential
- Tele-Neurology and Tele-Stroke services managed by MUSC
- Practice Autonomy
- Collegial medical staff who promote teamwork, work efficiency, and the patient care experience
- Affordable housing in the Hartsville community
- Great supportive community with good public and private schools
- Hospital is 35 minutes major regional airport, 90 minutes to Charlotte International airport
- Approximately 1 ½ hours to Myrtle Beach, SC and Charlotte, NC; and less than 2 ½ hours to Charleston SC.

For more information about this exciting opportunity, please contact:

Cameron Mosier, Director of Physician Staffing and Development

Phone: 803-438-0868 or Email: Mosier@kershawhealth.org

CAPE FEAR VALLEY HEALTH

Hospital based Neurology practice is being reinvented for growth and advancement. The team is seeking individuals who are BE/BC in Neurology to compliment skills in stroke, epilepsy, and headaches. Proficiency in EEG/EMG is highly desirable due to existing volumes, but not required.

Cape Fear Valley Neurology offers state-of-the-art medical care and is equipped to handle a full range of inpatient and outpatient procedures. The group has achieved the Advanced Certification as a Primary Stroke Center under The Joint Commissions Disease-Specific Certification. Call rotation is 1:4.

We offer best in class compensation plus generous benefits package including sign on bonus and relocation allowance.

Cape Fear Valley Health is located in the thriving and diverse community of Fayetteville, NC which consists of more than 319,000 residents. Fayetteville has received the prestigious All-America City Award three times from the National Civic League and has been recognized for cultural diversity and municipal excellence by the National League of Cities.

Fayetteville is known for its many golf courses with the Home of Golf, aka Pinehurst, located only 30 minutes from the city. Our central location provides easy access to some of the most beautiful beaches in the country to our east and to the majestic Blue Ridge Mountains to our west. In addition to our central location, our mild climate, low cost of living and patriotic spirit makes it an ideal city for rising healthcare professionals and families. As the sixth largest city in North Carolina – and growing – both Fayetteville and Cape Fear Valley Health's healthcare needs are on the rise.

Please Contact Ashley Dowless, Corporate Director of Physician Recruitment for more details at (910) 615-1888 or adowl@capefearvalley.com.

Join One of the Premier Healthcare Systems in Virginia

OPEN 2018

JETPORT MEDICAL FACILITY

Portland, Maine: Neurologist Opportunity

A new regional headache center opening in desirable Portland, Maine is seeking a board certified or eligible neurologist with subspecialty focus on headache treatment to be the director of Neurology and a multispecialty clinic dedicated to combining pharmacologic, procedural and surgical techniques for the elimination or reduction of headache pain.

QUALIFICATIONS: Candidates must possess an MD or DO degree and be board certified in Neurology by the ABPN. They must possess a desire to work independently as well as to collaborate with other providers with the common goal of developing and delivering a treatment algorithm that maximizes prevention and relief from cervicofacial pain and minimizes long term cost or dependence on long term medications. Qualifications are necessary for pursuing a medical license in Maine.

PREFERRED QUALIFICATIONS: Candidates with experience in various cranial nerve blocks, chemodenervation, RFA, neurostimulation and infusion protocols. An interest in inpatient management of headache syndromes, and facial pain is beneficial, but not necessary. Preferred applicants will be certified or eligible in Headache Medicine through the UCNS.

RESPONSIBILITIES: This position is primarily, if not exclusively, geared towards out-patient clinical treatment five days per week with NO nighttime or weekend call. Pursuit of other aspects of general neurology is encouraged. Collaboratively direct a nurse practitioner to maximize patient care. Initial responsibilities include clinic design and community outreach to help identify patients who are being ineffectively treated, as well as those at risk for developing cervicofacial pain syndromes. An interest in clinical research, including participation in multi-institutional studies, is preferred. An interest in the education of other medical professionals is necessary, and of medical students and residents, preferred.

COMPENSATION: Compensation is generous at or above the high end of current salary expectations, and is commensurate with the level of experience and added qualifications. Opportunities exist for becoming an equity partner. A generous benefit package includes medical insurance, dental insurance, malpractice insurance, 401K retirement plan, CME travel and flexibility in vacation scheduling.

APPLICATION: Please include a cover letter and CV.
These should be sent to andersonsh@live.com. Contact 207-478-7165

Take your career to the next level

**Comprehensive Stroke Center
Medical Director
Novant Health Presbyterian Medical Center
Charlotte, NC**

Novant Health neurosciences is seeking a board-certified/eligible, vascular-trained neurologist to serve as full-time neurohospitalist leading five full time inpatient neurohospitalists as the Comprehensive Stroke Center medical director. The successful applicant should have three to five years of medical directorship experience. The dual patient care and leadership position is an exciting opportunity to work at Novant Health Presbyterian Medical Center, a 622-bed tertiary medical center which houses the only Joint Commission-certified comprehensive stroke center in the Charlotte region. There is an 11-bed dedicated neuro ICU with four full-time dedicated neurointensivists offering 24/7 inpatient coverage. Additionally there are three neuroendovascular neurosurgeons and two interventional neuroradiologists offering 24/7 interventional capability.

Qualified candidates should submit a formal CV to Eric Eskioglu, MD, neurosurgeon and Novant Health senior vice president c/o: Traci Lacy, Novant Health neurosciences, at tlacy@NovantHealth.org

Join URMCC – Department of Neurology

Expanding to Better Serve Our Region

We are seeking Board Certified and Board Eligible candidates for the following positions:

General Neurology | Neurohospitalist | Headache | Neuromuscular | Movement Disorders | Epilepsy | Dementia

Faculty appointment, competitive salary, signing bonus, relocation and generous University benefit package.

Founded in 1966, the University of Rochester Medical Center's (URMC's) Department of Neurology includes a faculty of 140 members in multiple subspecialty divisions and general neurology. The *U.S. News and World Report* survey ranked URMC's Departments of Neurology and Neurosurgery #39 out of 1,359 hospitals nationally and top 10 in NIH funding for Neurology.

We are currently expanding in the Rochester area and the Finger Lakes region. As a member of our faculty, you'll enjoy a great professional career, mission-driven work and a high quality of life, including:

- Low cost living, highly-ranked schools, family-focused communities, safe environment, short commute and easy access to area airports.
- The natural, scenic beauty of the Finger Lakes region and all that the four seasons have to offer.
- Quaint boutique shops, landmarks, museums, art galleries, festivals, music and theater.
- Outdoor activities ranging from fishing to hiking and biking, watersports, skiing, golfing and more.
- Sampling the region's award-winning wines, craft beers, dining, farmer's markets with organic farm-to-table foods.
- Exploring the 11 pristine Finger Lakes, surrounding state parks, gorges and waterfalls.

Please email CV to Karol_Marciano@URMC.Rochester.edu, or call (414) 704-6578.
